

Health & Safety....

Doesn't just cover the competition round, but is something to consider with all your training/playtime with your dog....

We want everyone to enjoy themselves, and whilst not wishing to become too "Nanny" like....please be responsible. A favourite saying from a client -

"the trouble with common sense...is, that it isn't very common any more"

So....

Risk assessment? The activity, the environment, yourself, equipment, facilities.....

Including but not limited to dogs in hot cars? public access to where you might train? security of your valuables while training? Footwear? a first aid kit location? contact details for your Vet?....

Have you got your own insurance? If not, do you need it?

Please read our guidelines along with the KC Welfare guidelines....
